Excellent point, thank you Jill. I will certainly factor Chris's role in, especially for early coordination.

Hi all,

Chris and I were talking this morning about his upcoming projects and the potential to be involved in the Pebble EIS review. We realize that we don't have the application yet, but recognize that there could be a dredged material component of the project related to disposal of material for a marine port/terminal. We discussed the importance of keeping Chris in the loop, if applicable, as it relates to discussions over the next few weeks on EPA authorities, potential cooperating agency decisions, and communications around the Region.

Thanks,

Jill
